POLES PILING EROSION CONTROL LUMBER HARDWARE

**GOING GREEN** with **R<sup>2</sup>**

**Recycled Reinforced Silt Fence**

PROPERTY	TEST METHOD	REC40
<b>Mechanical</b>		
<i>Tensile Strength (grab)</i>	ASTM D4632	95 lb
<i>Elongation</i>	ASTM D4632	20/27%
<i>Puncture</i>	ASTM D4833	32 lb
<i>Mullen Burst</i>	ASTM D3786	124psi
<i>Trapezoidal Tear</i>	ASTM D4533	38 lb
<b>Longevity</b>		
<i>UV Resistance</i>	ASTM D4355	95% @ 500 HRS
<b>Hydraulic</b>		
<i>Permittivity</i>	ASTM D4491	2.27 (s-1)
<i>Water Flow Rate</i>	ASTM D4491	170 gpm/ft <sup>2</sup>

Cobb Lumber is proud to introduce the first ever erosion control silt fence made from discarded plastic bottles. It is reinforced with fiberglass wire that is stronger than steel. This fiberglass wire is woven into the fabric to prevent separation. With UV additives, this is a true environments friend in the erosion control business
